

The group of companies carries out works on “turnkey” artesian water supply.

These works can be divided into the following groups:

1. **Borehole projecting**
 1. ***Development of the working project of the well***
 2. ***Coordination of the project in permitting bodies (Pivnichgeologiya, Ekologiya, Sanitary-Epidemiological Inspection Service) and receipt of "Drilling Permits"***
3. **Borehole drilling**
 1. ***Drilling of industrial boreholes with simplified design***
 2. ***Drilling of industrial high-flow-rate boreholes***
 3. ***Borehole drilling for the private sector***
 4. ***Borehole drilling for drawdown***
 5. ***Borehole drilling for thermal pumps***
 6. ***Drilling of boreholes with "non-standard design"***

1. [Assembly of water-lifting equipment](#)
2. [Borehole completion \(construction of pump stations\)](#)
 1. *Underground pavilion*
 2. *Semiburied pavilion*
 3. *Surface pavilion*
 4. *Heat chamber*
5. [Water-supply line laying](#)
6. [Plugging-back of boreholes](#)
7. [Repair of boreholes, reconstruction](#)
